PROFILE

Passionate about both functionality and aesthetics, I am an Information Technology student at the University of Jember specializing in software development. With hands-on experience in collaborative projects and UI/UX design, I leverage modern frameworks to create impactful, user-friendly web and mobile applications. I am highly motivated to explore new technologies and continuously grow as a professional.

ORGANIZATIONAL EXPERIENCE

Technology Innovative Challenge 9.0 (National-Level Web Development Competition)

Public Relations Division (June 2026 – present)

- Managed the event's social media presence by crafting engaging content and captions to boost visibility and participant engagement.
- Acted as the primary liaison for external stakeholders, effectively communicating and coordinating with competition judges and participants.
- Handled incoming inquiries and provided timely, accurate updates regarding competition schedules, guidelines, and announcements.

Tim PPK Ormawa BEM FKM

Technology Division (May 2026 – Present)

- Designed and developed a dedicated website for a community flood mitigation program, handling both UI/UX design and Web development.
- Integrated IoT water level sensors with the web platform to provide real-time monitoring and data visualization for early flood warnings.
- Managed the end-to-end technical workflow, ensuring reliable data transmission from the hardware sensors directly to the web dashboard.

UKM University Student English Forum (USEF)

Public Speaking Division (January 2025 – December 2025)

- Facilitated public speaking training and regular practice sessions to enhance members' English communication skills and confidence.
- Organized and participated in speaking forums, discussions, and internal events to foster a supportive and educational environment.
- Assisted members in structuring speeches, improving delivery techniques, and building strong arguments for presentations.

EDUCATION

UNIVERSITAS JEMBER (2024 – Present)

Information Technology - GPA 3.88 / 4.00

SKILLS

- **Programming** : HTML, CSS, Javascript, TypeScript, ReactJS, NextJS, TailwindCSS, C#, Dart, Python, Github, Git
- **Data** : SQL, MySQL, PostgreSQL, Firebase, Supabase.
- **Design** : UI/UX Design, Social Media Design, Poster Design, Logo Design
- **Software and Tools** : Figma, Github, PgAdmin, Postman, Docker, Visual Studio Code, Canva, Capcut, Microsoft Word, Microsoft Excel, Microsoft Powerpoint,
- **Soft Skills** : Creative Thinking, Emotional Intelligence, Problem Solving, Empathy
- **Languages** : Bahasa Indonesia (Native), English

PROJECTS

SimoGura – [June 2026] – [Github]

Tech Stack: Figma, Flutter, Dart, ESP32, Supabase, MQTT

- Developed an IoT-integrated mobile application for Gourami fish farming to automate the monitoring of water quality, replacing inefficient manual checks.
- Implemented real-time tracking for temperature, pH, and water levels using ESP32 microcontrollers and MQTT protocol, ensuring accurate data transmission.
- Built automated alert notifications and historical data management via Supabase to assist farmers in analyzing productivity and reducing fish mortality rates.

SiKandang – [December 2025]

Tech Stack: Figma

- Designed an IoT-based mobile application to digitalize medium-scale poultry farm management, replacing inefficient manual monitoring.
- Implemented real-time tracking for environmental factors (temperature, humidity) and automated feeding schedules to optimize harvest productivity and reduce human error.

Aduin Jember – [June 2026] – [Github]

Tech Stack: Figma, Flutter, Supabase, Maps API, Camera API, Dart

- Built a smart city public complaint mobile application to facilitate transparent reporting of infrastructure and social issues in Jember Regency.
- Integrated Maps API for automatic geotagging and Camera API for visual proof in the "Sambat" feature, alongside developing a quick-response emergency button.

Travel Best – [Month Year]

Tech Stack: Figma, PostgreSQL

- Created a tourism trip management and booking information system for Besttrip.Bwi to transition their manual operations into a streamlined digital workflow.
- Developed features for schedule management, participant quotas, and digital booking histories to improve customer service speed and data security.

Jñānaloka – [June 2026]

Tech Stack: Figma, Canva, C#, Windows Forms, PostgreSQL

- Developed a desktop-based school library management application to digitize the book borrowing process, resolving issues with long queues and inaccurate manual data.
- Implemented real-time book catalog tracking and role-based access for students, librarians, and curriculum staff to ensure efficient administrative workflows.
